

Tamer Ağaoğlu

March 02, 1988

İzmir/Bornova Turkey

About

I'm 33 years old. Married and Have two sons. I am working 8 hours per day. I'm ready to relocation at nearest time and I like short business trips (about 1 week). I practice creative approach all the time in work and live. I think what most important thing in development is understanding of problem (creating problem) and thinking about build: ideal case is solve the task without any line of code.

I like learning and discovering new things and areas. My hobbies are traveling, reading, ham radio and hiking.

Expreience

I'm Team Lead of Backend Developer, PHP Laravel / Symfony — 6 years, Python Django 3 years, Node NestJS 4 month in web-dev more than 14 years. I am responsible for writing server-side web application logic. I usually develop back-end components, connect the application with the other web services, and support the front-end developers by integrating their work with the Python or PHP application. Have worked with PHP (Symfony), Python (Django).

I'm creating RESTful and GraphQL APIs, working by service-oriented paradigm. I use Agile/Scrum.

Language

- Turkish (Native)
- English (Elementary A2)

My Interest 🥰

- GraphQL
- Microservices
- Scale web apps
- Real-time web apps
- IoT
- Automation

History

Backend Team Lead

90Pixel
Nov 2020 - Present
1 year

İzmir, Türkiye

- Symfony
- NestJS

Backend Developer

Aplazame

Mar 2019 - Agu 2020

1 year

Remote

- Flask, Django
- Laravel

Full-Stack Developer

PekDijital

Sep 2018 - Mar 2018

Bartın, Turkey

- Laravel
- ReactJS + Redux

Back-end Developer

AC Bilişim

Dec 2014 - Sep 2018

4 year

Ankara, Turkey

- Flask, Django
- PYQT
- Raspberry Pi

Web Application Developer

Webolizma

Dec 2009 - Mar 2014

4 year

Ankara, Turkey

- CakePHP
- Yii framework

Back End Languages

- PHP
- Python
- Node

Frameworks

- Django + Django Rest Framework
- NestJS
- Symfony + Api Platform
- Laravel + Nova
- PYQT & QT

Web API

- Server Side Events
- WebSockets
- Fetch (CORS, Blob, Multipart)
- Notifications API
- WebAuthn
- Web Workers, Service Workers, Shared Workers
- Payment Request API
- Push API

Databases

- PostgreSQL
- MySQL
- MongoDB
- WebSQL
- IndexedDB

Caching

- Redis
- Memcache
- RabbitMQ

Task & Project Management

- GitHub
- Jira
- ClickUp

Data centers

- AWS
- DigitalOcean

Protocols

Other Vim, Linux Ubuntu, VS Code, Atom, WebPack, Babel, ESLint, Gulp, Postman, Geolocation, Bash scripts, JWT, Socket.io, Lodash, Let's encrypt, Nmap, CloudFlare, DNS Made Easy, Docker (Swarm, Machine, Compose).

Copy of Projects

# Year	Project	Used
2021	TUA Turkish Space Agency	PHP [Symfony / RestApi]
2020	Corpeo Private Video Portal	PHP [Symfony / RestApi]
2020	Novastor	Partner Portal - PHP [Symfony / RestApi]
2020	Rideo	Car Rental - PHP [Symfony / RestApi]
2020	Kodilan	Python [Django / RestApi]
2020	IlanKutusu	Python [Django / RestApi] via RabbitMq JS [ReactJS]
2019	DuyuruBu	Manage Device System - PHP [Laravel / RestApi] Python [Queue] via RabbitMq JS [ReactJS]
2019	TA2OJY	Server-side APRS Tracker - Python
2018	FollowerStar	Google Chrome Extension - Javascript

# Year	≡ Project	Aa Used
2018	b2b.renatcarp.com	B2B Platform - PHP, Doctrine
2018	Casefixer	Google Chrome Extension - Javascript
