About

I'm 33 years old and married also have two sons. I am working 8 hours per day. I'm ready to relocate at the nearest time also I like short business trips (about one week). I practice a creative approach all the time in work and life. I think what most important thing in development is understanding the problem (creating the problem) and thinking about the build: an ideal case is to solve the task without any line of code.

I like learning and discovering new things and areas. My hobbies are traveling, reading, ham radio, and hiking.

Expreriece

I'm Team Lead of Backend Developer, PHP Laravel / Symfony — 6 years, Python Django 3 years, Node NestJS 4 mouth in web-dev for more than 14 years. I am

responsible for writing server-side web application logic. I usually develop back-end components, connect the application with the other web services, and support the front-end developers by integrating their work with the Python or PHP application. I have worked with PHP (Symfony), Python (Django).

I'm creating RESTful and GraphQL APIs, working by service-oriented paradigm.

I use Agile/Scrum.

Language

- Turkish (Native)
- English (B1)

My Interest 😍

- GraphQL
- Microservices
- Scale web apps
- Real-time web apps
- IoT
- Automation

History

Backend Team Lead

```
90Pixel
Nov 2020 – Present
1 year
İzmir, Türkiye
- Symfony
- NestJS
```

Backend Developer

```
Aplazame
Mar 2019 – Agu 2020
1 year
Remote
- Flask, Django
- Laravel
```

Full-Stack Developer

```
PekDijital
Sep 2018 – Mar 2018
Bartin, Turkey
- Laravel
- ReactJS + Redux
```

Back-end Developer

```
AC Bilişim
Dec 2014 – Sep 2018
4 year
Ankara, Turkey
- Flask, Django
- PYQT
- Raspberry Pi
```

Web Application Developer

```
Webolizma
Dec 2009 – Mar 2014
4 year
Ankara, Turkey
- CakePHP
- Yii framework
```

Back End Languages

- PHP

- Python

- Node

Frameworks

- Django + Django Rest Framework
- NestJS
- Symfony + Api Platform
- Laravel + Nova
- PYQT & QT

Web API

- Server Side Events
- WebSockets
- Fetch (CORS, Blob, Multipart)
- Notifications API
- WebAuthn
- Web Workers, Service Workers, Shared Workers
- Payment Request API
- Push API

Databases

- PostgreSQL
- MySQL
- MongoDB
- WebSQL
- IndexedDB

Caching

- Redis
- Memcache
- RabitMQ

Task & Project Management

- GitHub

- Jira

- ClickUp

Data centers

- AWS

- DigitalOcean

Protocols

Other Vim, Linux Ubuntu, VS Code, Atom, WebPack, Babel, ESLint, Gulp, Postman, Geolocation, Bash scripts, JWT, Socket.io, Lodash, Let's encrypt, Nmap, CloudFlare, DNS Made Easy, Docker (Swarm, Machine, Compose).
